# Black 1200mm high Blade Gate Converter

Easily transform your 1200mm high **blade aluminium fence panel** into a custom-width gate with this DIY converter kit. Designed for blade panels with 40x40mm horizontal rails, it provides a cost-effective alternative to ordering custom-made gates.

Features:

- Converts standard blade fence panels into gates up to 1500mm wide
- Compatible with 1200mm high blade panels featuring 40x40mm horizontal rails
- Simple installation: cut the panel to size, insert the converters, and secure with the included screws
- Pool fence compliant when using a 1200mm high panel and maintaining a gap of 80mm or less between picket edge and inner gate stile edge
- Constructed from durable, powder-coated aluminium for long-lasting performance
- Kit includes: 2 converters (left and right) and 4 screws

Note: Hinges and latch sold separately.
