

1200 - 1240mm Brushed Nickel Inline Sliding Shower Screen

**SPACINGS BASED ON THESE ASSUMPTIONS:**

- Fixed panel installed with Purty wall brackets which produces a 3mm silicone join gap. If wall channel is used, specified opening sizes overlaps, etc will change.
- Edges of glass door must remain 10mm from wall. 10mm door bulbs recommended to use for buffering or if not used, 10mm safety margin gap required.
- When door is open, minimum 15mm gap is required from wall (for safety margin buffering).

*\*When using a 650mm wide fixed panel, it is important to purchase 1x slimline wall bracket separately (STAL-RWBS-/STAL-RWBS-8-/STAL-RWBS-ORD/STAL-RWBS-NIKI) due to space restrictions between the rail fixing bracket and the wall.*
