

Brushed Nickel Glass Shower Screen Wall Bracket

Page Link: [Brushed Nickel Glass Shower Screen Wall Bracket](#)

Used to fix Hinge and Return/Fixed panels to the wall.

3 Per Panel recommended

- Wall Bracket
- 3mm Gap between glass and wall
- Brushed Nickel Finish
- Square Finish Edges
- Suitable for 8mm & 10mm Glass
- 2 x Compression/Friction screws
- No holes in glass required
- Made from solid brass
- 1 x Fixing screw and Clear Gaskets Provided

Silicon must be used along glass edge when friction brackets used

Some people also use these along the floor however we do not recommend this as the screw will break the waterproofing membrane, the whole glass weight will be positioned on the bracket rather than spread across the length of the sheet and the glass will be held 3mm off the floor.
